Orbit Digital

Response to Request for Proposal — Proven Procurement Platform Expertise

Executive Summary

Orbit Digital has specialized in procurement and vendor management software for 15 years, with a portfolio of long-term enterprise clients across manufacturing, retail, and logistics. Our proposal draws on deep domain experience delivering measurable procurement outcomes.

Understanding of Requirements

Having delivered similar evaluation platforms for numerous clients, we understand this project requires a reliable system for scoring supplier proposals against configurable criteria and producing rankings that procurement teams can trust and defend to stakeholders.

Proposed Solution

Orbit Digital will deliver a cloud-hosted evaluation platform covering document intake, scoring, and reporting. We will integrate with your existing systems using industry-standard methods and our team's extensive experience connecting to enterprise environments across many prior engagements.

Implementation Approach

We follow a standard staged delivery approach: requirements confirmation, build, testing, and rollout, drawing on templates and accelerators refined across 15 years of similar projects.

Timeline

Phase	Duration
Requirements Confirmation	3 weeks
Build	20 weeks
Testing	6 weeks
Rollout	3 weeks

Team Structure

• Engagement Lead — 12+ years procurement software delivery experience

• 2x Senior Architects — 10+ years experience each

• 4x Engineers

• 1x QA Analyst

Milestones

Milestone	Target Week

Requirements Confirmed	Week 3
Build Complete	Week 23
Testing Complete	Week 29
Go-Live	Week 32

Price Table

Line Item	Amount (USD)
Discovery	$70,000
Build	$460,000
Testing	$65,000
Training	$45,000
Year 1 Support	$110,000
Total (Year 1)	$750,000

Pricing Assumptions

Standard fixed-price terms for the scope described above. Additional integration work beyond standard connectors will be scoped and priced separately once specific target systems are confirmed.

Security Controls

Data is encrypted at rest and annual security audits are performed by an independent third party. Single sign-on (SSO) is available as a configurable option for enterprise clients.

Compliance Information

Our platform supports GDPR compliance requirements. Orbit Digital is currently pursuing SOC 2 certification, with completion expected within the next fiscal year.

Risks

Standard delivery risks apply, including scope changes and resource availability. These are managed through our established project governance process, refined across many similar engagements.

Support Model

Standard support is available 8 hours a day, 5 days a week. A premium 24/7 support add-on is available for an additional fee for clients requiring extended coverage.

Relevant Experience

Orbit Digital has delivered six comparable procurement and supplier evaluation platforms over the past decade, including engagements that reduced average procurement cycle time by 40% for a national retailer, improved

supplier scorecard turnaround by 55% for a manufacturing group, and consolidated vendor evaluation processes across 12 business units for a logistics conglomerate.
